Great Lakes and
Ohio River Division

- ✓ **95 Navigation Projects**
- ✓ **91 Harbors**
- ✓ **99 miles of structures**
- ✓ **611 miles of channels**
- ✓ **3200 miles of coastline**

US Army Corps
of Engineers
Detroit District

Sault Ste. Marie New Lock

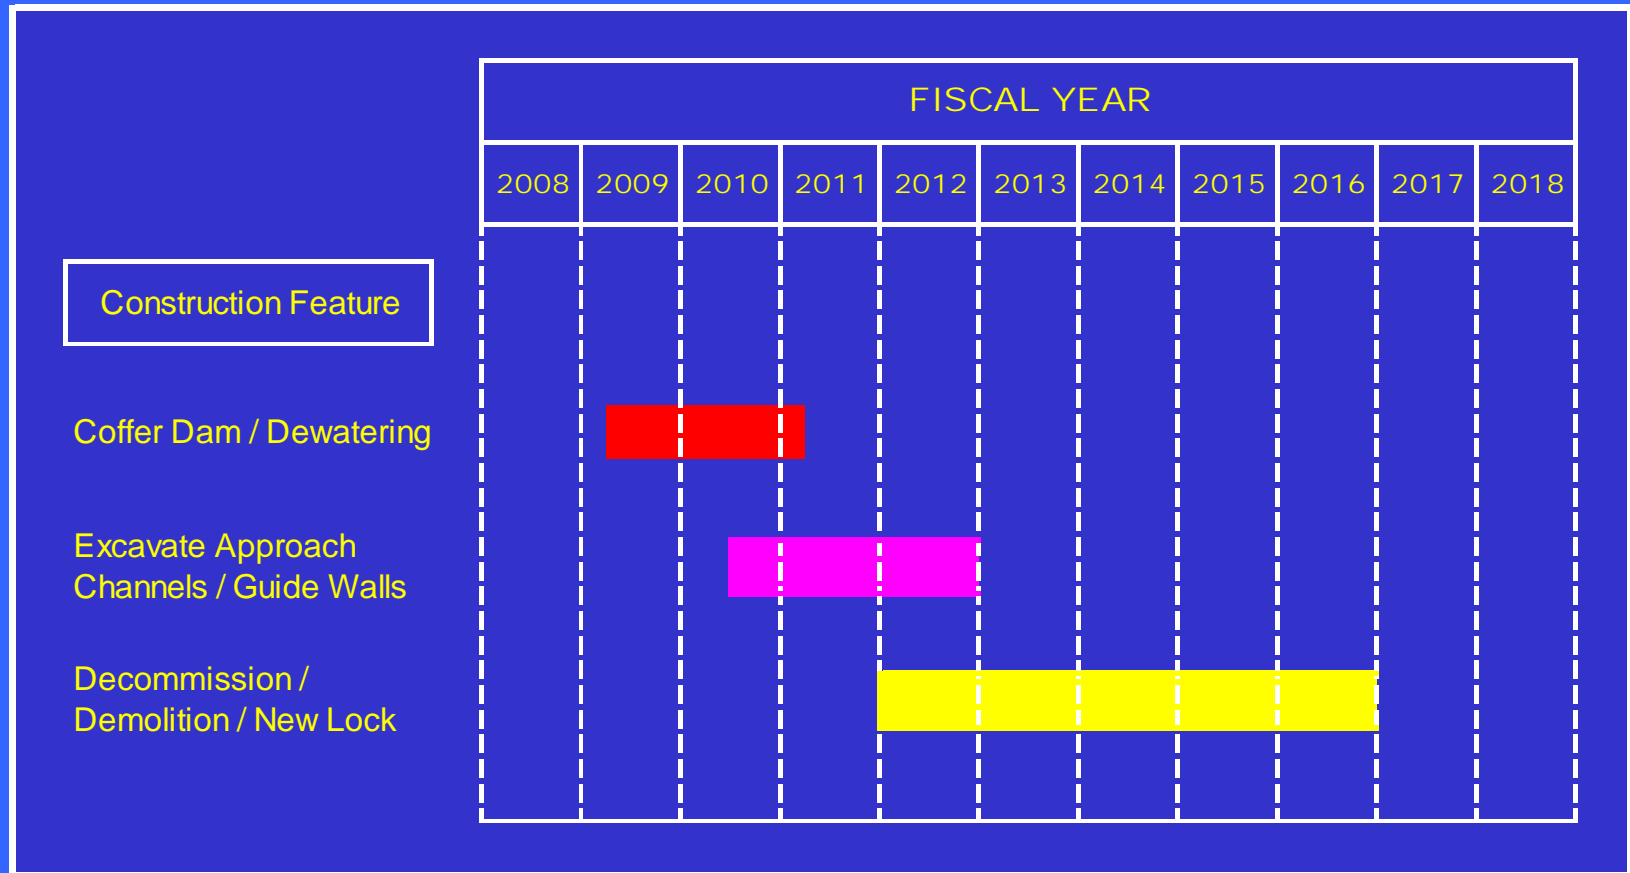

- Construction of a lock the same size as the Poe Lock on the site of the existing Sabin and Davis Locks. The purpose is to have a two lock system that can accommodate the large lake vessels to avoid any disruption of service.
- Such a break in service would cause serious problems for industries and companies that rely on shipments of raw material using the 1000-foot vessels.
- WRDA 2007 included a provision for construction of the new lock at full federal expense at a total authorized cost of \$341,714,000 (2007 dollars). Construction could begin as early as 2009 if funding is provided.
